From being more mainstream in 2017, to being nearly dead in 2018, there was a lot that happened. However, if there was one event that really shifted the cryptocurrency into the mainstream, it was the rise and fall of the Japanese exchange Mt Gox. Mt. Gox was once the largest and most popular Bitcoin exchange in the world. However, as the problem with the platform grew, Mt. Gox was forced to cease all Bitcoin trading, and all Mt. Gox customers had their Bitcoin lost. Fast forward to 2018, and the resurrection of Mt. Gox. Originally established as 'Magic: The Gox', the re-launch of the Mt. Gox service as its name suggests, Mt. Gox was a success, with Japanese regulators approving the service, and new Mt. Gox customers flocking to the site. The site is still working today, and you can visit the Mt. Gox website to see for yourself, despite the site not having any trading going on. In short, the rise and fall of the Bitcoin exchange Mt. Gox is a big reason why the cryptocurrency is still mainstream today. Other Events There have been other events that have contributed to Bitcoin being mainstream. The most recent was the great controversy surrounding Bitcoin Cash and the forking that occurred. The fork had two distinct parts, and they have continued to exist. The majority of the cryptocurrency community did not support Bitcoin Cash, as the majority of them believed that Bitcoin
